Rainbow Records  
Vancouver, BC

Dear Lucy VanPatten,

We have created a proposal for the redesigned Rainbow Records website and database connection, which we spoke to you about recently.

This proposal details our entire project scope, where we will redesign the Rainbow Records website to have an easy to navigate user interface, including support for mobile devices. We will also connect the database to the website, allowing for automation of customer and product data.

In total, we plan to complete our project in 31 weeks. This consists of meetings, development, testing, and launch. We will also provide a 10-week maintenance period to assist with the transition to the new system.

Attached is our proposal, which includes more information about our project. If you have any questions or concerns, do not hesitate to contact us.

We look forward to working with you,

PMNV IT Services
