Dear Hiring Manager, ^{to and from addresses}
^{subject}

I am writing to express my interest in the Front-end Developer role at your company. ^{Activision} As a student of Computer Information Technology with a projected completion date of April 2024 and a passion for web development, I am confident that I have the technical skills and experience necessary to be a valuable asset to your team.

My educational background has provided me with a solid foundation in web development, and I have honed my skills by designing and developing a notetaking application using HTML, CSS, and JavaScript. I am also familiar with database management and have constructed a functional database for player and team statistics for sporting games. Additionally, my experience with Python has allowed me to complete projects using fundamental Object Oriented Programming concepts.

^{Really like how you seperated the different experiences and how each role gave you experience.} My previous work experience has also provided me with strong communication and interpersonal skills, which I have honed as a Camp Leader at the Hastings Community Centre, a Healthcare Officer at Paladin Security, and a Sales Associate at Under Armour. My ability to communicate and deal with a wide range of individuals, combined with my training in use of force and restraint, make me a strong candidate for this role.

I am excited about the opportunity to bring my technical skills and experience to your team and contribute to the development of innovative and impactful websites. I am eager to further discuss my qualifications and enthusiasm for this role and thank you for considering my application.

^{Include phone and email}

Sincerely,

Saad Al-Mridha

Overall really good, not much i would change, but i would like to see more personal/specific ways for how you can contribute. For example: I am confident that I can work collaboratively/apply my skills with the team at Activision. or contribute my programming and problem-solving skills to the integration of multiplayer features into the next Call of Duty
