Application for Software Development Internship - Summer 2023 (R019050)

Dear Hiring Manager,

I am excited to apply for the Software Development Internship position at Demonware (Activision) for the summer of 2023 (R019050). I came across this opportunity on LinkedIn. As a Computer Information Technology student at the British Columbia Institute of Technology (BCIT), I was immediately drawn to the chance to work with a company that is dedicated to delivering online and data services for some of the world's biggest video game franchises.

I have gained experience in various programming languages, including Python and JavaScript, and I am comfortable with using Linux and Git for version control. I have also worked on a variety of software development projects, including a MySQL database for a sports team and a personal website. These experiences have allowed me to develop strong problem-solving and analytical skills, as well as proficiency in debugging code. I am confident that these technical qualifications, combined with my eagerness to learn, make me a strong candidate for this internship.

In addition to my technical qualifications, I have experience working in teams and collaborating with others. Through many group tasks at BCIT and working for Greater Vancouver Food Trucks, I have honed my organizational and communication skills and have worked on projects where teamwork was essential for success. I am confident that I can work collaboratively with the team at Demonware and contribute to a positive and productive work environment.

I am thrilled about the opportunity to contribute my programming and problem-solving skills to the integration of multiplayer features into the next Call of Duty. Please find my resume attached for further details on my experience and qualifications. I can be reached by phone or email at (604)-345-2347 and mafonso4@my.bcit.ca. Thank you for your time and consideration, and I look forward to discussing my candidacy further.

Sincerely,

Markus Afonso
