Dear Hiring Manager,

RE: Application: Software Developer Intern Position @ Konrad

instead of found on your website, maybe do found in the careers information on konrad.com

I am writing to express my interest in the Software Developer Intern position I found on your website. I am currently enrolled in the Computing Information Technology program at the British Columbia Institute of Technology, as an aspiring developer with three years of customer relations experience and a robust problem-solving skill set. My development skills would be a perfect fit for your company's goal of developing consumer and enterprise applications.

I like the how the ending of each paragraph emphasizes how your going to provide

I have a strong understanding and experience in HTML/CSS/JavaScript, and have developed interactive websites, one of which allows users to create, read, update, and delete notes. Utilizing my Python knowledge I created a system clean-up script that allows users to remove unused/redundant files, and developed a desktop application using C# to perform probability calculations.These projects have provided me with hands-on experience in bringing projects from conception to a deliverable solution, and have honed my time management skills.

Really like the examples used!

Seperate/add personal and technical abilities

? ~~My technical ability~~, a strong command of core programming and computer science concepts, and interpersonal skills makes me an ideal fit for this role. I am eager to learn from Konrad's highly-skilled development team and participate in code review and extensive testing to ensure high-quality software.

Thank you for considering my application, attached to this letter is my resume. I look forward to further discussing my qualifications and how I can contribute to Konrad.

add email and phone number in closing paragraph

Sincerely,

Wen Kai Quinten Leung

I think overall its a solid cover letter, i think it could be better if theres a menotion of team work and collaboration. With the projects we've done, its easy to share experiences.
